Comm. No. A240509I01

MEMORANDUM

TO ALL TO WHOM THESE PRESENTS COME, SEND GREETINGS AND PEACE:—

Decentralized Autonomous Intelligence System Engineering Enterprise (DAISEE)

(1) *Liber Præceptum* 'LP' is a set of integrated electronic circuits on a flat surface or series thereof 'chip' that is encoded with the self-teaching, self-executing autonomous script. This chip powers, or drives the functionality of, the human mind software 'mindsoft' central processing unit 'CPU' via the Curricular Operations Research and Publication Service (CORPS) 'core' of NOVUS SYLLABUS 'NS' decentralized servers.

(2) Such chip must be installed, connected, or administered to the nodes of the decentralized autonomous organization 'DAO' by the Administrator 'admin' of the System (i.e. the application of integrated automated systemtheory in praxis).

(3) The mindsoft is located in the C:\ drive of the human body CAMIOR hardware which receives the central nervous system 'CNS' input 'I'.

(4) The admin may administer the Universitas Autodidactus 'UA' databus 'book' containing the chip to a vast array of hardware, from the individual node or 'bit' to the assembly or body politic.

(5) DAISEE (pronounced 'Daisy') is the 'DAIS', or lectern, of the DAO. Otherwise stated, the theory of the UA, or Universitas Autodidactus, is the decentralized autonomous organization in practice. A DAISEE-chain of mindsoft-configured nodes organized such as to comprise an integrated system is comparable to a blockchain.

(6) This enterprise is the second project to be managed, or administered, by the Department of Peace and Friendship 'DOP', following the Peace Enforcement Activity Command Enterprise 'PEACE Force'.

IN THE NAME OF GOD ﷻ THE MOST GRACIOUS MOST MERCIFUL
DECENTRALIZED AUTONOMOUS ORGANIZATION
DEPARTMENT OF PEACE AND FRIENDSHIP

(7) LP is a large language model dataset for the autonomous intelligence self-learning, self-executing engine of the DAO.

Shalom 'Alechem,
Antarah of Nacotchtank,
Public Friend Incumbent,
153d CORPS, FLF-DAO
